

Advancing the Continuity of Patient Care

InfuSystem Case Management

Working Hand in Hand to Deliver Compassionate Patient Care

As your trusted partner for infusion care, InfuSystem has dedicated a team of case managers to support your patients beginning their treatment at home. Our case managers are registered nurses and are here to support your clinical team by providing one-on-one dedicated patient communication, including supplemental pump education, answers to insurance questions, necessary paperwork and important patient resources.

Our Case Management Team is a resource for your clinicians. We're here to lessen your day-to-day workload so you can focus on what's most important: patient care.

How Does It Work?

Patient Care Kit

We provide a patient-friendly Care Kit that includes:

- Patient Resource Guide
- Pump Education
- Chemotherapy Spill Kit
- Introduction to the InfuSystem Mobile App
- Nursing Hotline Information

Dedicated Patient Support – One-On-One Patient Call With An InfuSystem Case Manager

We coordinate a convenient time with your patient to review:

- Patient Resource Guide
- Insurance questions & financial responsibilities
- Necessary paperwork
- Pump education
- Answer patient & caregiver questions
- The 24/7 Nursing Hotline: **1-800-315-3287**

Patient Care Follow-Up Call – Second Day of Treatment

We call your patient on their second day of treatment to answer any questions your patient has and to ensure the pump is infusing as expected.

Supporting Patients Each Step of the Way

Our InfuSystem Case Management Team is here to help.

- Dedicated one-on-one patient support
- Pump education & resources
